- **Design:** Axure, Prototyping, Mockups, User Personas, Affinity Diagramming, Sketch
- **Other technical skills:** HTML, CSS, Latex, Terminal, Google App Engine

## Experience

**User Experience (UX) Intern**, *OpenStax*, Houston, TX

May 2018 – Aug 2018

- Audited the OpenStax Subjects page and Book Details page for accessibility issues and designed a medium-fidelity prototype addressing these issues
- Co-designed an automated usability test participant recruitment/research system
- Developed 3 high-fidelity prototypes for the OpenStax webview reading experience
- Participated in 2 design sprints for a new reading experience product

**Computer Science Summer Institute**, *Google*, Cambridge, MA

July 2017

- Learned web development in HTML, CSS, JavaScript, Python, and Google App Engine from Google Senior Software Engineers
- Worked in a team of three to create App Map

## Projects

**When2Meet: Redesigned**

Sept 2018

- Design Track project for HackRice 8.0
- Modified and recreated UI for scheduling web application When2Meet
- Using HTML, CSS, and JavaScript developed and styled new event page, personal and group availability page

**App Map**

July 2017

- Web application that helps high school students navigate the college admissions process through a personalized account, event planner, application materials checklist, and resources for financial aid, scholarship programs, and testing
- Front-end: using HTML and CSS, developed and styled side bar navigation, personalized account page, registration page, and testing resources page
- Back-end: using Python and Jinja, developed handlers for the login, event planner, and checklist, utilized App Engine User APIs for authentication and datastore
